

## Sofie Haug Children's Day – Care Centre

September 8, 2023 | BIG SEE Wood Design Award 2023 – Winner, City and community (public and commercial wooden buildings), Germany, Wood

Mystic woodland sanctum for children as contemporary emulation The architects have created an enchantingly mystic hybrid-timber building with a walkout basement set into a slope, its architecture emulating the terrain, perfectly adapted to the surrounding woodland. The brightly framed entrance is set at an angle within the two-story timber façade made of charred spruce and contrasting glazed teal spruce that weaves a pattern. To the south, there is a protective access balcony structure with ultra-slim steel columns and two hot-dip galvanized

REPORT

The embedded glazed walkout basement with its movement space is filled with atmosphere. Reflections and the supporting structure showing through as a stylized root system interconnect architecture and nature.

Tragwerk GmbH,  
DE-Eutingen im Gäu

### Client

Universitätsstadt  
Tübingen

### Year of completion

2022

### Location

Tübingen, Germany

### Total area

861 m<sup>2</sup>

### Photos
